

hezhong^{ep37}

detail description

Getting started

launch

feature

ep37 sdk

- ☒ dms alarm
- ☒ dms face

sdk configure

- ☒ init param

material fetch way

- ☒ read local dir
- ☒ read remote `http` url

cfg customization

- ☒ result folder
- ☒ record folder
- ☒ predefine task list
- ☒ number of repeat operation for each batch material run
- ☒ run time unit `millisecond` for each pic material run

order

1. choose one subcommand append to program tail

- local
- remote

```
# ./exe local
```

2. append to option and flags

- -c/--cfg
- -e/--empty_sdk_call

```
# ./exe local -c ./cfg.toml -e
```

complete example

1. run local cfg task, use real sdk call

```
# ./exe local -c ./cfg.toml
```

2. run local cfg task, use empty sdk call

```
# ./exe local -c ./cfg.toml -e
```
